## Oxfordshire Glaucoma Compliance Scheme

Oxfordshire Glaucoma Compliance Scheme (GCS) is funded by the NHS and is available for patients registered with an Oxfordshire GP.

The service supports patients who are having difficulties using the drops they have been prescribed to treat glaucoma.

### Glaucoma Medication Compliance Optometrists can help when:

- You are not sure when to put your drops in
- You cannot get the drops into your eyes
- You cannot open the drops
- You cannot hold the drops

The optometrists listed on this leaflet can offer an appointment to help you find solutions so you can use your drops.

Help may be in the form of advice on techniques, or advice about aids that you can purchase to make it easier to administer your eye drops.

### Information about your GCS appointment:

An appointment will be required, so phone first.

Appointments are available during normal working hours, Monday - Saturday. Not all practices have an optometrist available every day.

You **MUST** have a copy of your medication (or repeat prescription) from your pharmacist or GP practice to book an appointment.

**Please bring a copy of your medication (or repeat prescription) and your NHS number to your appointment.**

Patients **MUST** bring their glaucoma drops to their appointment.

It may also be helpful to have a family member or carer with you at your appointment.

Please note a GCS appointment is not a glaucoma check or an eyesight test.

### You should contact your GP if you have the following symptoms:

- Sudden change in vision
- Sudden eye pain
- Visual loss
- Trauma

**If you are unsure whether you can be seen by the Glaucoma Compliance Scheme please contact one of the accredited optometrists on this leaflet for advice.**
